

6 Easy Steps

For Floral Care & Handling

1 Clean Start
All buckets, tools, counters-tops, work-tables, coolers, walls, floors and delivery vans should be cleaned on a regular basis.

Pro tip:

Chrysal Glory provides a shield to all flowers, plants and foliage. It enhances colors, freshness and reduces evaporation. Spray it in all bouquets, arrangements, and corsages.

2 Hydration is Key
Be sure to hydrate all dry packed flowers in Chrysal Professional #1 Hydration Solution. After a fresh cut, Hydration for a minimum of 2 hrs.

3 Transport & Hold
Chrysal Professional #2 is a reusable liquid that hydrates and provides enough food to survive the distribution and sales period without premature bud development.

4 Vase & Bouquets
Chrysal Professional #3 contains nutrients for the full development of flowers. Maintains true colors and scent of flowers. For bouquets be sure to provide flower food.
