

Chrysal Universal Recyclable Paper Powder Sachet – Eco-Friendly Freshness for All Cut Flowers

Overview: Chrysal Universal Recyclable Paper Powder Sachets provide essential nutrients tailored specifically to maximize the freshness and vase life of all types of cut flowers. Ideal for both single varieties and mixed flower arrangements, these recyclable paper sachets significantly improve floral quality and longevity while supporting sustainability.

Key Benefits:

- Extends vase life by up to 60% compared to plain water.
- Promotes vibrant flower colors, optimal flower opening, and superior leaf quality.
- Guarantees vase life exceeding 7 days under optimal conditions.
- Lowers water pH, ensuring prolonged freshness.
- Clear, odorless formulation for enhanced presentation.
- Sachets made from recyclable, totally chlorine-free (TCF), plastic-free paper material, contributing to a circular economy when correctly disposed of.

Convenient Application:

- Available in sachets for preparing 0.5 Liter (1 pint) or 1 Liter (1 quart) solutions.
- Also available in private label options.
- Recommended placement higher on bouquets as sachets are not waterproof.
- No need for water changes or stem re-cuts during vase life.

Cost Efficiency & Quality Assurance:

- Significantly reduces flower and plastic waste.
- Lowers potential consumer complaints, enhancing overall customer satisfaction.
- Provides excellent quality at minimal cost per stem.

Instructions for Use:

- **Dosage:** One sachet per 0.5 liter (0.5 quart) or 1 liter (1 quart) of tap water.
- **Storage:** Keep in cool, dry, and dark conditions (optimal temperature range 41°F and 77°F / 5°C to 25°C).
- **Shelf Life:** Up to 18 months when stored correctly.
- **Solution pH:** Ranges between 3.5 – 5.5 depending on water alkalinity.
- **Vase Compatibility:** Not recommended for use in unprotected metal vases (zinc, copper, iron) or antique crystal vases.

- **Maintenance:** If necessary, top up vase with additional water mixed with Chrysal Universal Recyclable paper Flower Food. Dispose of any residual solutions safely through sewer systems.
