

Chrysal Full Bloom (Liquid) – Vase Solution for Optimal Flower Development

Overview: Chrysal Full Bloom is a liquid vase solution designed for the optimal care and full development of all cut flowers. Suitable for use in both glass vases and floral foam arrangements, it provides the ideal balance of nutrients to keep flowers vibrant, fresh, and long-lasting.

Key Benefits:

- Prolongs vase life by up to 60% compared to water alone.
- Maintains natural flower colors and reduces fading.
- Keeps stems and leaves firm and green.
- Lowers the pH of the water to improve absorption and freshness.
- Mixes clearly in water with no odor.

Convenient Application:

- Available in 500 ml bottles.
- Ideal for use in glass vases and floral foam arrangements.
- Compatible with all types of tap water.

Cost Efficiency & Quality Assurance:

- Significantly reduces flower waste.
- Minimizes customer complaints.
- Delivers professional-level quality at low cost per stem.

Usage Recommendations:

- **Dosage:** Use 15 ml (1/2 fl. oz.) per liter or quart of tap water.
- **Storage:** Keep in cool, dry, and dark conditions (optimal temperature range 41°F and 77°F / 5°C to 25°C).
- **Shelf Life:** 18 months when stored in sealed packaging under proper conditions.
- **Solution pH:** Ranges between 3.5 – 5.5 depending on water alkalinity.
- **Vase Compatibility:** Not recommended for use in unprotected metal (zinc, copper, iron) or antique crystal vases.
- **Maintenance:** If necessary, top up vase with additional water mixed with Chrysal Full Bloom. Dispose of any residual solutions safely through sewer systems.
