

# Chrysal Professional 2 Classic – *Conditioning Solution for Extended Freshness*

**Overview:** Chrysal Professional 2 Classic is a floral conditioning solution formulated for wholesalers, bouquet makers, and retailers. It is suitable for all cut flowers except Anthuriums and delivers hydration and essential nutrients without triggering full bloom during storage or retail display. It is part of the Chrysal Guarantee Concept.

### Key Benefits:

- Stimulates water uptake and prevents a bent neck.
- Lowers water pH for better hydration.
- Keeps flowers and foliage in optimal condition.
- Extends vase life compared to water alone.
- Leaves and stems remain firm and green.
- Dissolves clearly in water with no odor.

### Convenient Application:

- Compatible with all types of tap water.
- Suitable for use with automatic dosing systems.
- Dosage can be monitored using a glucometer.
- Available in 1-gallon, 2.5-gallon, and 5-gallon packaging.

### Cost Efficiency & Quality Assurance:

- Reduces flower waste.
- Cuts water usage and labor costs due to reusable solutions.
- Extends shelf and distribution period.
- Minimizes potential consumer complaints.

### Usage Recommendations:

- **Dosage:** 10 ml per quart (1 liter) of water.
- **Handpump (15 ml):** Use one pump for every 1.5 quarts (1.5 liters) of water.
- **Storage:** Keep in dry, cool, and dark conditions (41°F to 77°F / 5°C to 25°C).
- **Shelf Life:** 18 months in sealed packaging.
- **Solution pH:** 3.5 – 5.5, depending on water alkalinity.
- **Reuse:** Solution may be reused for up to 5 days, depending on conditions.
- **Compatibility:** Do not mix used and fresh solutions. Avoid use in unprotected metal buckets (zinc, copper, iron) and acid-sensitive materials.
- **Disposal:** Residual solutions may be safely drained into the sewage system.

Chrysal Professional 2 Classic ensures superior hydration and freshness for flowers during critical storage and display phases, helping preserve beauty and reduce waste.
